DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest the claimed tire parameter sensing system for a vehicle especially the combination of **a tire-based unit** associated with the a tire and including structure for sensing a parameter, e.g., tire inflation pressure, and for transmitting a parameter signal indicative of the sensed parameter, the parameter signal *having at least first and second different signal characteristics*; **a vehicle-based unit** *having first and second receiving channels* and a signal detection portion, the first receiving channel receiving portions of the parameter signal *that include the first signal characteristic and providing a first data signal indicative thereof*, the second receiving channel receiving at least portions of the parameter signal *that include the second signal characteristic and providing a second data signal indicative thereof*, the signal detection portion of the vehicle-based unit receiving the first and second data signals and, in response to the first and second data signals, determining the sensed parameter of the tire.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
